PROJECTS

• Payment Gateway Web Application

- Description: Developed a payment gateway web application using Next.js.
- Database: Utilized MongoDB for data storage.
- ORM: Leveraged Prisma for efficient database operations.
- Styling: Designed the UI with Tailwind CSS and Shadcn.
- Authentication: Implemented JWT token for secure user authentication.
- Icons and Themes: Integrated React icons and customized themes using Next themes.
- State Management: Utilized Recoil for efficient state management.
- Vercel Link: [Payment App](#)

• Game Web Application

- Developed a game web application using React, React Query, and React Router.
- Efficiently managed application state with Zustand for streamlined state management.
- Designed the user interface using Chakra UI, ensuring a visually appealing and responsive experience.
- Deployed the application on Vercel for seamless hosting and accessibility.
- Vercel link: [Game Web App](#)

• Response Issue Tracker

- Built a responsive issue tracker using Next.js, Prisma, and Supabase.
- Integrated user authentication with NextAuth and the OAuth Google provider.
- Styled the interface using Radix UI, Next UI, and Tailwind CSS.
- Vercel link: [Issue Tracker](#)

• Journal App

- Developed a dynamic journal app using Next.js.
- Implemented initial authentication with Clerk Docs and Google Auth.
- Leveraged Prisma and Supabase for efficient database operations.
- Vercel link : [Journal App](#)

SKILLS

- HTML
- JAVASCRIPT
- CSS
- TYPESCRIPT
- REACT
- NEXT.JS
- GIT
- DOCKER

- NODE JS
- PRISMA
- EXPRESS
- MONGODB
- MYSQL
- POSTGRESQL
- Linux
- Bash Scripting

ALSO USED

- AWS | CLOUDFLARE | RECOIL | ZUSTAND | REDUX | REACT QUERY | REACT ROUTER | AXIOS | REST API | TAILWIND CSS | CHAKRA UI | NEXT UI | RADIX UI | SHADCN UI | REACT HOOK FORM | ZOD | DATAGRIP | MONGOOSE | NEXTAUTH | CLERK DOCS | SUPABASE | JWT | POSTMAN | BCRYPT
